

ENVIRONMENTAL POLICY

The awareness of “Human and Environment First” forms the basis of our Environmental Policy.

Disciplines all our operations in accordance with Environmental Management System standards and determines risks and opportunities, We monitor, measure and continuously improve our performance.

In all our activities and throughout the product life cycle, we ensure the effective use, protection and recycling of resources. Continuous improvement activities to use recycled materials, reduce waste and prevent pollution We determine and make it happen.

Opportunities for reuse and recycling in order to reduce waste and use resources effectively we evaluate.

We participate in studies and practices aimed at protecting the environment and include them in our business processes. Our employees We attach importance and support to doing business that is environmentally friendly, sensitive and based on scientific foundations.

We take measures to minimize our impact on climate change.

We regularly monitor our GHG (greenhouse gas) and carbon emissions and operate to be carbon neutral. We manage our processes.

We follow all laws and regulations regarding the environment and fulfill our legal and other obligations we bring it. We include environmental elements in our purchasing processes.

We encourage our supply chain to measure and reduce GHG (greenhouse gas) and carbon emissions, and discipline We do the necessary work to make them happen.

We inform all our stakeholders about our environmental performance.

We regularly inform and train all our employees about our environmental compliance and principles.

We ensure that our employees, customers and suppliers comply with legal and other environmental requirements we wait.

Informs our suppliers about SEGER's environmental principles, provides training if necessary and ensures that our suppliers we expect it to be environmentally sensitive and compatible.
