

## ENVIRONMENTAL POLICY

Reducing SEGER's carbon emissions is one of our main goals. We are passionately committed to achieving our goal of reducing our carbon emissions by 40% by 2030.

### With this determination;

- We are determined to include ISO 50001 energy management in our operational processes and ensure its continuity.
- We are aware of the impact of our energy consumption on the environment and we aim to reduce this impact in our facility.
- We design our products by taking energy performance into account in long-term planning.
- We attach importance to design related to energy efficiency and energy performance and consider it as a part of our supply chain.
- We review and record monthly energy data according to our sustainable goals and targets. We ensure that all our employees have access to information and resources.
- We identify the best practices for energy efficiency and include them in the processes.
- We carry out continuous improvement activities to reduce energy consumption in our operations.
- We closely follow technological developments to ensure energy efficiency.
