

## RECYCLING AND CIRCULAR ECONOMY POLICY

The increasing demand for resources at the global level has led to a noticeable increase in their consumption caused acceleration.

Classical linear and natural resources based on extraction, production, use and disposal. Overcoming the unsustainable model, giving way to the reuse and recycling model is necessary. The global structuring takes its position at this point.

The new circular model uses materials and derived products as consumer goods circular, allowing them to be reintegrated into the value chain at the end of their life processes, maximum use of resources and the least possible waste generation aims.

SEGER implements all the principles of the circular economy within the scope of its sustainability model while applying; encourages all its suppliers to be involved in this process.

With this understanding, we support recycling and circular economy. In this direction, all in our activities;

- We integrate the circular economy into our corporate strategy and decisions we integrate it into the purchasing process.
- We constantly improve the waste management standard.
- Value circular economy and savings opportunities we give.
- Use waste as a material or energy source we evaluate.
- We reduce the use of non-renewable natural resources and waste materials as secondary raw materials we reintroduce it into the production cycle.
- Active use of recycled materials we encourage as.
- Can be reused or reused at the end of their use purchasing recyclable materials and products we encourage its purchase.
- Environmental impact at all stages of the product or service eco design to reduce in terms of life cycle we encourage.
- We carry out improvement work to prevent waste.
- Efficiency and process efficiency in the use of resources cares about optimization, low emission energy using resources and more efficient technologies we aim.
- For our stakeholders in the field of circular economy we carry out awareness raising activities and training.
- Our stakeholders for the purposes of this Policy we work in collaboration with.
- If we cannot answer your request/question, we must we will make a statement.
- We make effective use of IT services.
- We set service standards in our Quality Policy, Ethics Creates in line with our Business Rules and we monitor our performance.
- To improve the expertise and skills of our teams we will continue.
- We welcome your feedback, provided to us we examine every subject in depth and do this ourselves we consider it as an opportunity to improve.
